

# PHARMACOLOGICAL REVIEWS

## *Editorial Board*

OTTO KRAYER, *Chairman*

GEORGE H. ACHESON

MARK NICKERSON

H. BLASCHKO

DOUGLAS S. RIGGS

ERIK JACOBSEN

BÖRJE UVNÄS

GEORGE B. KOELLE

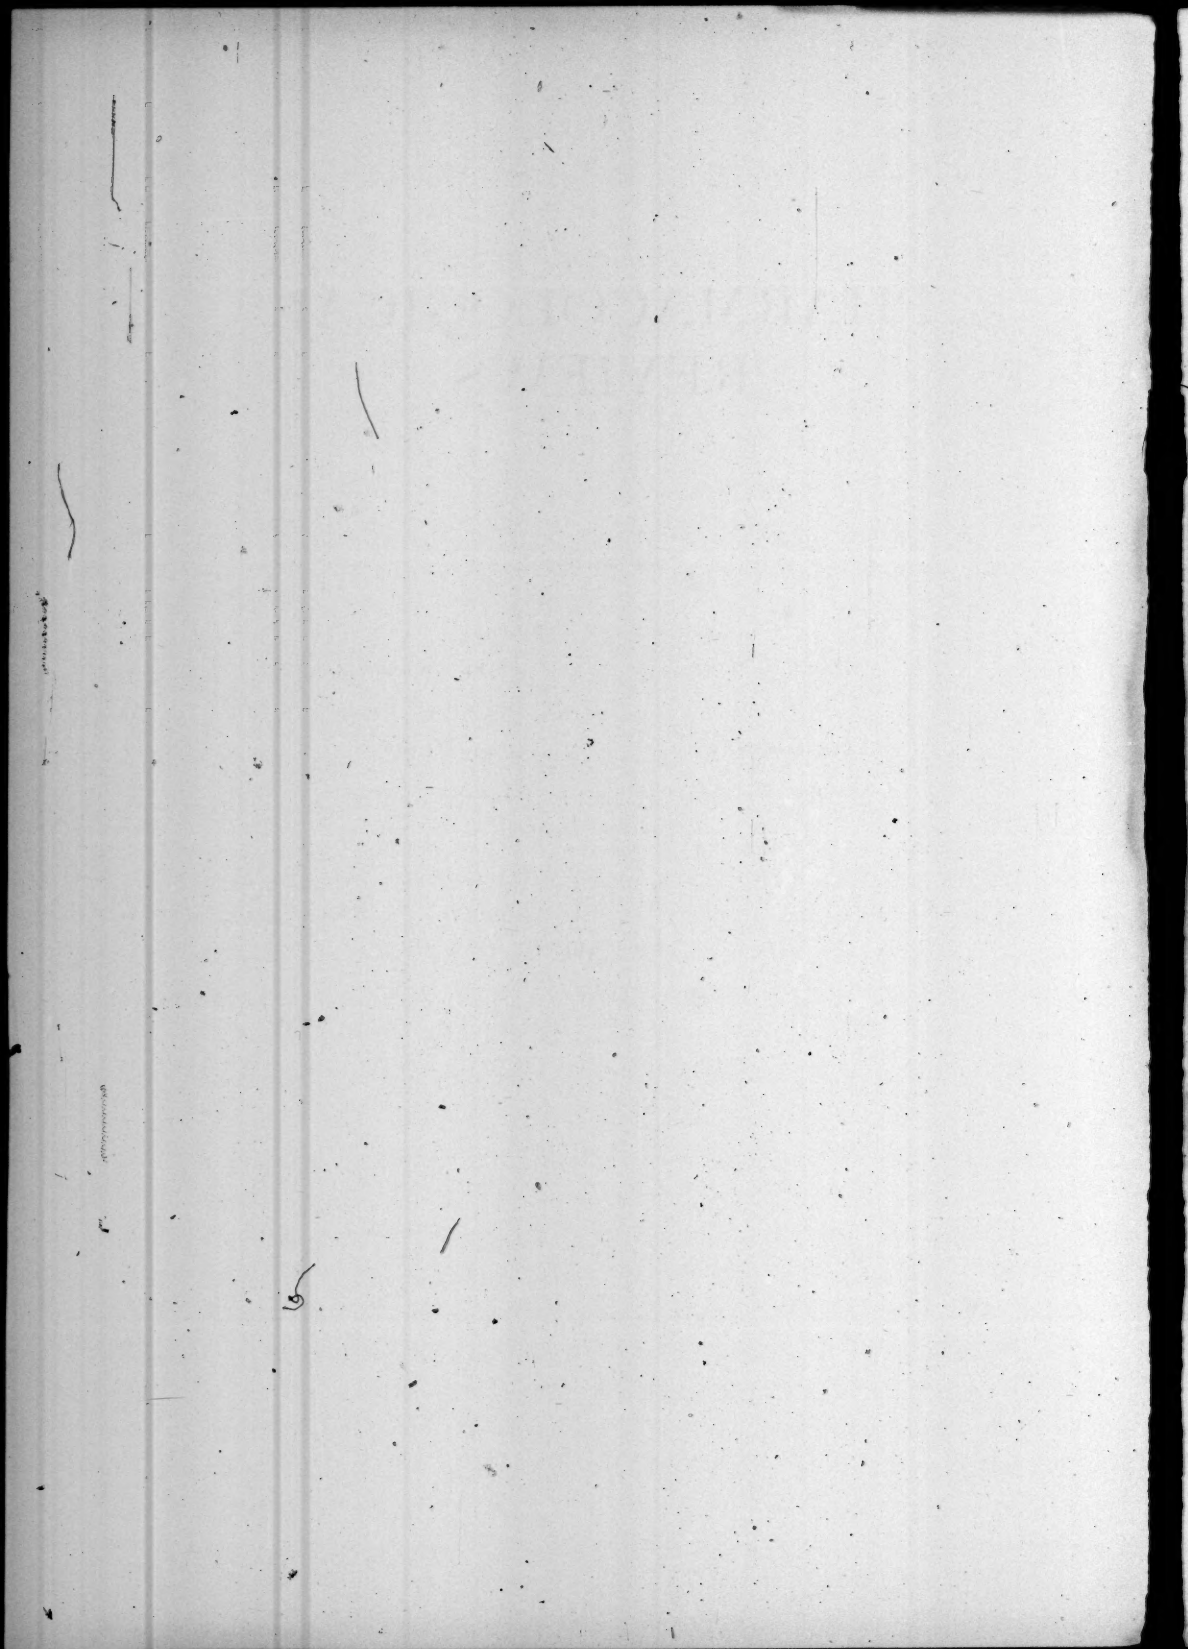

MARTHE VOGT

MILES WEATHERALL

VOLUME 9

1957

BALTIMORE, MARYLAND

## CONTENTS OF VOLUME 9

### NUMBER 1, MARCH 1957

|   |    |
|---|----|
| Influence of antioxidants and redox substances on signs of vitamin E deficiency. H. DAM ..... | 1  |
| Biology and pharmacology of the lithium ion. M. SCHOU .....                                   | 17 |
| The measurement of pain. H. K. BEECHER .....  | 59 |

### NUMBER 2, JUNE 1957

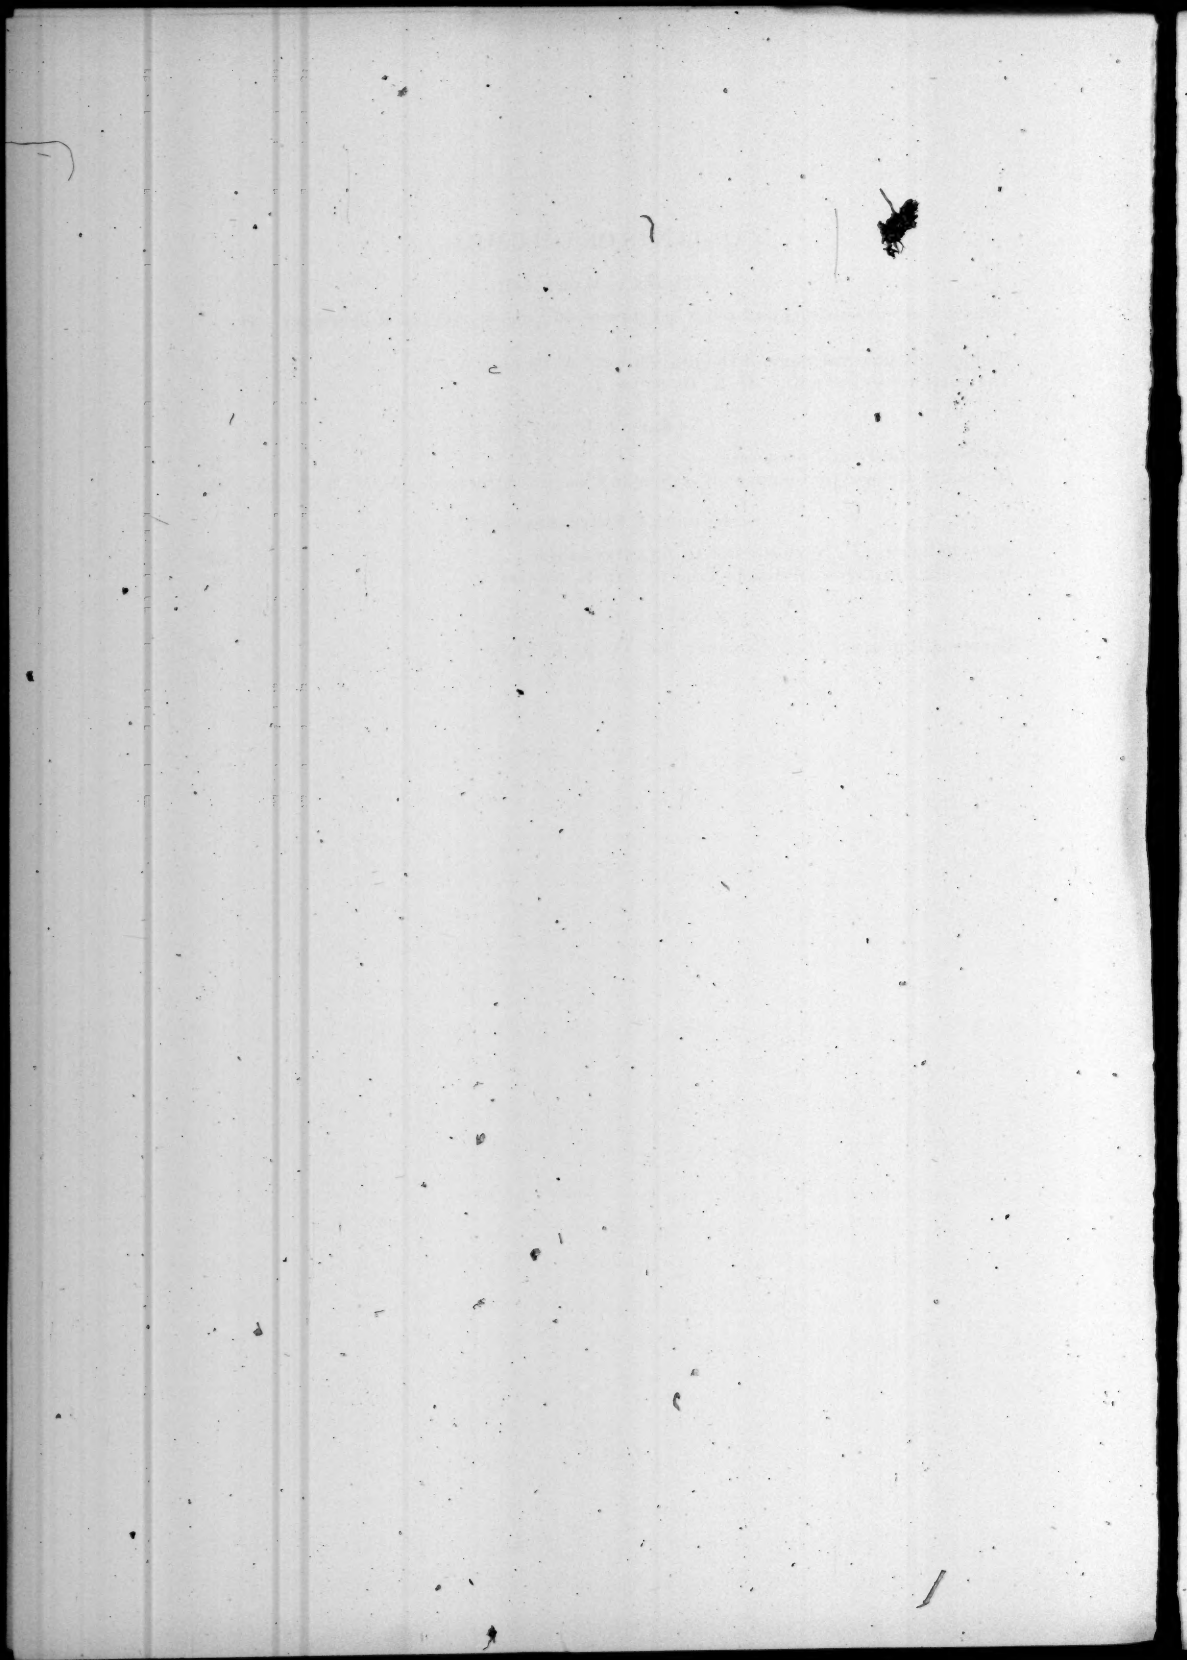

|   |     |
|---|-----|
| SYMPOSIUM on Drug Antagonism .....  | 211 |
| Histamine Release by Compounds of Simple Chemical Structure. W. D. M. PATON ..... | 269 |

### NUMBER 3, SEPTEMBER 1957

|  |     |
|--|-----|
| Anthelmintics. E. BUEDING AND C. SWARTZWELDER .....    | 329 |
| Hormonal Regulation of Tumor Growth. R. L. NOBLE ..... | 367 |

### NUMBER 4, DECEMBER 1957

|   |     |
|---|-----|
| Bacterial Pyrogens. I. L. BENNETT, JR., AND L. E. CLUFF ..... | 427 |
|---|-----|

# INDEX

- Absorption, tissue, by lithium, 35
- Adrenal, function, and endotoxins, 448
  - steroids, effects of, on tumor growth and leukemia, 387
- Affinity, intrinsic activity and drug interactions, 218
- Aging, as factor in threshold of pain, 130
- Analgesic agents, in determining pain threshold, 147
- Antagonisms and antagonists, of drugs, 237
- Anthelmintics, 329
  - clinical evaluation, 331
  - mode of action, 330
- Antihistamines, 304
- Antihistaminics, kinetics of recovery from inhibition of, 259
- Antioxidant effect *in vivo* of vitamin E, 1
- Antispasmodics, kinetics of recovery from inhibition by, 259
- Ariens, E. J. Affinity, intrinsic activity and drug interactions, 218
- Ascariasis, life cycle and clinical manifestations, 331
- Atropine, kinetics of recovery from inhibition of, 259
- Autonomic nervous system, as influence in pain threshold, 130
- Bacteria, metabolite antagonisms in, 264
- Bacterial pyrogens, 427
  - history of, 427
  - physical and chemical properties, 430
- Bacteriology and terminology of endotoxins, 430
- Beecher group's method for measurement of pain, 93
- Beecher, Henry K. Measurement of pain, 59
- Bennett, Ivan L., Jr., and Cluff, Leighton E. Bacterial pyrogens, 427
- Bilharziasis, life cycle and incidence, 352
  - chemotherapy of, 353
- Biological effects of endotoxins, 432
- Blood and blood forming organs, in lithium poisoning, 42
- Bueding E., and Swartzwelder, C. Anthelmintics, 329
- Carbohydrate metabolism, and endotoxin injection, 447
- Carbon dioxide tension, elevation of, in threshold of pain determination, 132
- Chemical methods for measurement of pain, 90
- Circulatory change, in pain threshold, 131
- Cluff, Leighton E., *see* Bennett, Ivan L., Jr., 427
- Collier, H. O. J. Metabolite antagonisms in bacteria, 264
- Compound 48/80, properties of, 295
- Conducted heat, used in measurement of pain, 78
- Cyanine dyes, effects of, on metabolism of helminths, 337
- Dam, Henrik. Influence of antioxidants and redox substances on vitamin E deficiency, 1
- Depigmentation, of rat incisors, in vitamin E deficiency, 7
- Diathesis exudative, as sign of vitamin E deficiency, 3
- Diffusion technique, in histamine release, 276
- Distribution, of endotoxin after inoculation, 432
  - organic, by lithium, 35
- Drug antagonism, *symposium*, 211
  - and  $pA_2$ , 242
  - nonequilibrium, 246
- Effects of induced hormonal deficiency on tumor growth, in animals, 383
  - in man, 398
- Electrical methods for measurement of pain, 80
- Elimination, by organisms, of lithium, 37
- Encephalomalacia, as sign of vitamin E deficiency, 4
- Endogenous hormonal action, in animals, 369
  - in man, 391
- Endotoxins, as therapeutic agents, 458
  - lethal effects, 439
  - mechanism of action, 449
  - role in human disease, 456
  - tolerance to, 452
- Enterobiasis (oxyuriasis), life cycle and clinical aspects, 346
- Exogenous hormonal action, in animals, 372
  - in man, 393

- Fever, endotoxin produced, 441
- Fragmented tissue, in histamine release, 277
- Gaddum, J. H. Theories of drug antagonism, 211
- Gastric effects of endotoxin, 448
- Gastrointestinal tract, as affected by lithium poisoning, 39
- Gout and urinary calculi, as treated with lithium, 44
- Heart and circulation, as affected by lithium poisoning, 42
- Hematological effects of endotoxin, 434
- Hemodynamic effects of endotoxin, 433
- Heparin, 301, 305
- Histamine, 269
  - content in systemic blood, 270
  - depletion of tissues, 306
  - delayed depressor response, 271
  - effects of, 273
  - intradermal injections of, 274
  - liberators, 307
  - release by compounds of simple chemical structure, 269
  - itching after, 309
  - mechanism of, 310
  - urinary excretion of, 274
- Histamine-releasing substances, Table of, 287
  - of natural origin, 298
- Hookworm infections, 341
- Hormonal regulation of tumor growth, 367
- Houde group's method for measurement of pain, 99
- 5-Hydroxytryptamine, 302
- Hyperalgesia, in pain threshold determination, 133
- Infection, resistance to, effect of endotoxin on, 437
- Intracellular particles, in histamine release, 277, 282
- Kidneys, in lithium poisoning, 44
- Kinetics of recovery from inhibition by antihistaminics, atropine and antispasmodics, 259
- Lee's method for measurement of pain, 92
- Lithium, ion biology and pharmacology of, 17
  - compared to sodium ion, 47
  - medical uses of, 44
  - occurrence in nature, 18
  - physical and chemical properties of, 17
  - salts, use in psychiatry, 45
- Loewe, S. Antagonisms and antagonists, 237
- Manic patients, use of lithium in treatment of, 46
- Mast cells, in histamine release, 277, 283
- Mechanical methods for measurement of pain, 84
- Metabolic effects of lithium, 20
- Metabolite antagonisms in bacteria, 264
- Methods for measuring pain, 67
  - experimental pain, 67
  - pathological pain, 92
- Morphogenetic effects of lithium, 19
- Nickerson, Mark. Nonequilibrium drug antagonism, 246
- Noble, R. L. Hormonal regulation of tumor growth, 367
- Nonequilibrium drug antagonism, 246
- Pain, measurement of, 59
  - definition of, 61
  - statistical calculation of, 103
- Pathological pain, in methods for measuring pain, 92
- Paton, W. D. M. Histamine release by compounds of simple chemical structure, 269
- pA<sub>2</sub>*, Drug antagonism and, 242
- Perfused organs, method of study of histamine release, 275
- Piperazine, pharmacological and biochemical aspects of, 336
- Poisoning, treatment in lithium intoxication, 44
- Psychiatric use of lithium salts, 45
- Psychic reaction to pain, 168
- Pyrogens, bacterial, 427
- Race, as factor in variation of threshold of pain, 130
- Radiant heat, used in measurement of pain, 71
- Redox substances, for prevention of, vitamin E deficiency, 1
- Roche e Silva, M. Kinetics of recovery from inhibition by antihistaminics, atropine and antispasmodics, 259
- Schild, H. O. Drug antagonism and *pA<sub>2</sub>*, 242

- Schou, Mogens. Biology and pharmacology of the lithium ion, 17
- Sex, as factor in variation of threshold of pain, 130
- Shwartzman reaction in endotoxin inoculation, 436
- Simonis, A. M. Affinity, intrinsic activity and drug interactions, 218
- Skin temperature, in determination of the threshold of pain, 132
- S.R.S., 302
- Strongyloidiasis, clinical manifestations, 344
- Sweating, in pain threshold determination, 132
- Swartzwelder, C. *see* Bueding, E., 329
- Systemic blood, rise in histamine content of, 270
- Taeniasis, life cycles, 350
- Theories of drug antagonism, 211
- Thermal methods for measurement of pain, 70
- Threshold of pain, 115
- constancy of, 121
- variation of, 130
- Tissue and species, variation of histamine release in, 300
- Tissue-injurious effects of endotoxin, 435
- Toxic effects, of lithium, 39
- treatment of, 44
- Trichinosis, 350
- Trichuriasis, life cycle and clinical manifestations, 337
- Tumor, hormonal regulation of growth of, 367
- Tumor-necrotizing effects of endotoxin, 435
- Uterus, discoloration of, in vitamin E deficient rats, 6
- Van Rossum, J. M. Affinity, intrinsic activity and drug interactions, 218
- Vitamin E, deficiency of, 1
- Whole animal, method of study of histamine release, 270
- Whole blood, leucocytes, and platelets in histamine release, 277, 281
